- Communication skills
- Time Management
- Problem-solving skills
- Technical Documentation
- Teamwork/Collaboration
- Attention to Detail

PROFILE

As an aspiring software developer/engineer, I am eagerly looking towards the future of technology with high hopes and excitement. With a background in physical tech as a hobby, I am keen to expand my realm of knowledge into the software side of things, seeking a career that aligns with my passion. As a sociable individual, I thrive in team environments and am eager to collaborate with like-minded professionals who are committed to building meaningful projects and growing together.

PROJECTS

BACKEND

Scales & Slumbers

July 2023 - August 2023

- Setup Node.js backend
- Used Express.js to expand usability
- Managed API calls
- Worked with MySQL DB
- Learned how to populate DB using JS scripts and CSV
- Learned React to work with Frontend

UX DEVELOPMENT

Designer Language

June 2023

- 3-part UX project to prep for Spotify development
- Conducted research, prototyping, and validation to prepare for a solution to the client's issues
- Worked with Figma to mock out what the fix might look like and wrote a Medium article divulging more info
